Education

Prince Shri Venkateshwara Padmavathy Enginnering College

Computer Science and Engineering B.E

CGPA: 8.446

Chennai, India

August 2021 - May 2025

Experience

Jorim Technologies and Solutions | Web Developer Intern Chennai | Feb 2024 - Mar 2024

- Developed a full-stack hotel booking web application called Have a Break using the MERN stack (MongoDB, Express.js, React.js, Node.js), enabling users to browse, book, and manage hotel stays.
- Designed and implemented RESTful APIs using Express and Node.js for seamless interaction between frontend and backend, including user authentication, booking management, and hotel data handling.
- Utilized MongoDB for efficient data storage, incorporating CRUD operations and Mongoose for schema modeling to manage user data, bookings, and hotel listings.

Skills

Programming Languages: Java Programming

Libraries/Frameworks: React JS, Spring Boot

Tools / Platforms: MySQL Workbench, VS Code, Eclipse, GitHub, Git

Databases: SQL, MySQL

Projects / Open-Source

HaveBreak : A hotel booking website | Link

MongoDB, Express.js, React.js, Node.js

Built and deployed HaveBreak, a full-stack hotel booking platform using the MERN stack (MongoDB, Express.js, React.js, Node.js) hosted on Render for reliable, real-time access. Integrated Razorpay payment gateway to enable secure online transactions with dynamic pricing and instant booking confirmations. Developed comprehensive CRUD operations for users, hotels, and bookings, ensuring smooth data management and a user-friendly experience comparable to commercial booking sites.

Blog Application | Link

Java, Spring JPA, Spring Security, PostgreSQL

Implemented secure user authentication, JWT-based login, and role-based access control using Spring Security. Developed RESTful APIs for blog management (CRUD operations) using Spring Boot and Spring Data JPA. Used PostgreSQL to store user credentials, roles, and blog content with proper entity relationships.

Secure NoteMaker | Link

Spring Boot, Spring Security, Spring JPA, React JS, MySQL

Developed a Secure Note Making App using Spring Boot, Spring Security, Spring Data JPA, React.js, and MySQL. Implemented role-based access control allowing admins full access to all user notes. Integrated OAuth login with Google and GitHub and implemented two-factor authentication (2FA) via email and authenticator app with QR code. Utilized SecurityContext for secure session management and designed RESTful APIs for complete CRUD operations consumed by the React frontend.

Deep Learning-Based Student Engagement and Activity Analysis in Virtual Classrooms for Higher Education

Python, OpenCV, TensorFlow/Keras, Scikit-learn, NLTK, NumPy, Pandas

Built a real-time student engagement monitoring system using Facial Emotion Recognition (FER) with ResNet50, and a Decision Tree-based engagement analyzer to classify emotions into engagement levels. Integrated NLP techniques to extract keywords from transcripts/student queries and recommend personalized learning content. Developed webcam-based FER using OpenCV, optimized frame processing for real-time performance, and modularized the system for easy integration with virtual classroom platforms.

Honors & Awards

Solved over 500+ problems on LeetCode, GeeksForGeeks, Code360, HackerRank.

10+ badges on LeetCode, 160 days challenge completion on GFG and achieved "GFG Backpack" as an award
